

Aptitude™ Series Student Desks

Premium Quality Classroom Furniture™

Aesthetics:

Long forgotten in our industry. Take a good look at the clean basic lines of our furniture compared to your other possibilities.

Heavy gauge Bookbox:

One piece, seamless, deep drawn bookboxes. It's not plastic. All our bookboxes are powder-coated, not enamel painted.

Bookbox:

Comes standard in Black. For a slight upcharge the bookbox can be painted to match seats and backs or any other color of your choice.

Attachments:

Bookbox is riveted securely to the frame (5 places). In the event the box or frame needs to be replaced, it can be replaced on-site quickly and easily.

Leg Room:

Desk design allows for unrestricted leg room from bottom of bookbox to the floor. No Knee-knocker! There is not a tube or brackets running under the length of the front of the top that restricts entering and exiting.

Heavy gauge steel frame:

Engineered to be overbuilt but not too overweight that the users and maintenance persons can't handle them. Minimum of 4-1/2" of total weld hold frame pieces together.

Full Nickel-Chrome Frame:

Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal. Our standard is 4-6 mills (25%-50% more than our competitors) of Nickel—it will not scratch. Our product is chromed on plateable quality tubing after all welding is completed to prevent rusting on unfinished welds.

Inserts:

Inserts are chrome plated to the same quality specifications as the frame. Adjustment screws pass completely through upper leg and lower inserts. They don't just press up against a dimple.

Functional / Versatile:

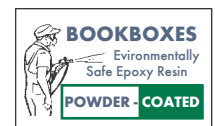

All our furniture comes in graduating heights, with different book storage capabilities, with your choice of colors to fit perfectly into your classroom environment.

Warranty:

- Lifetime frame structure warranty
- Eight year thermoset plastic warranty
- Two year finish/wearing parts warranty

Hard Plastic Melamine Work Surface:

Manufactured with ground hardwood flour, color pigment and melamine plastic resins, blended and compressed under heat and pressure to form a homogeneous material. It is almost maintenance free. Hard plastic resists marking and scratching. Pen marks, nail polish, and crayons wipe right off. Pencil Groove, doesn't warp and comes in your choice of five colors: Beige (standard), Charcoal, Light Gray, Walnut (upcharge), and Light Oak (upcharge).

Welds:

Four 2" welds connecting front leg to top support.

All tubular frame design:

No brackets that can catch little fingers: we designed around the student for strength, stability, and safety.

U-brace:

Our U-brace isn't just tacked on the outside of the front legs. Two standard 3/8" welds connect the U-brace leg support to the front legs. The leg support is inserted into the back of the front legs and sima welded, not "butted" and "tak-weld-ed" on the outside.

Glides:

Nylon or steel glide bottom glides, your choice, swivel type case hardened steel, super silent.

Completely Assembled:

Unit is shipped completely assembled. 100 % inspected and cleaned. Our leg inserts are not packed loose in a box. It is shipped as you specified having the most consistent quality in the business.

Glides:

Nylon or steel, your choice. Swivel design, case hardened steel, super silent deep ferrule. All glides make full level contact with floor. Designed so the maximum swivel angle of the glide is not violated.
